

A GREAT PLAN FOR ENTERPRISE IT & SECURITY SOLUTION

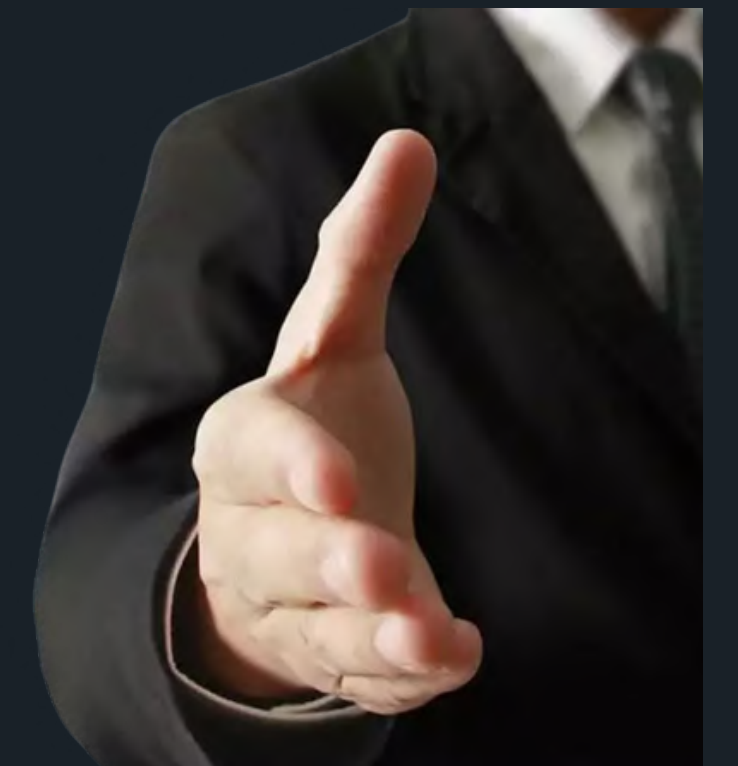

WHY IT EXPERTS ???

Your benefits

- More continuity
- Flexible access to IT expertise
- Innovate faster
- Advice and guidance

IT EXPERTS HAVE BEEN PROVIDING SERVICES LAST 11 YEARS IN THE GOVERNMENT SECTOR, HOSPITALS, SCHOOLS & PRIVATE SECTORS

Our customers – our priority Through IT EXPERTS Professional Services, you can work with motivated and well-trained employees with the right expertise in managing your IT infrastructure IT EXPERT consultants guide you with every important step in the evolution of your IT environment, such as the transition to the cloud. Based on our experience and best practices, we have developed an efficient approach that we would like to use for your organization.

IT EXPERTS STRENGTHS & VISION

A Professionally Managed IT Institution Total IT Solution & To be one of the corporate IT Solutions providers encompasses international standards of excellence.

IT EXPERTS VALUES & MISSION

**Client First, Services Excellence Quality Consciousness
Innovative Flexible & Dynamics To provide exceptional
products and services that not only meet mandatory needs
but exceed the expectation of our customers**

OUR SERVICES

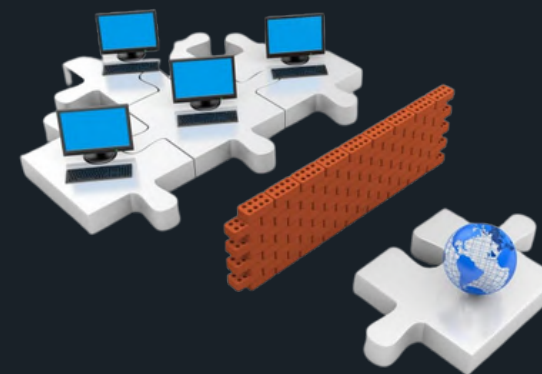

NETWORK SOLUTION

SERVER & STORAGE SOLUTION

IT INFRASTRUCTURE SOLUTION

FIREWALLS & SECURITY SOLUTIONS

CCTV SOLUTION

DATA CENTER MIGRATION

IP TELEPHONY SOLUTION

WIRELESS SOLUTION

FIBER & UTP SOLUTION

HOTEL LOCKING SOLUTION

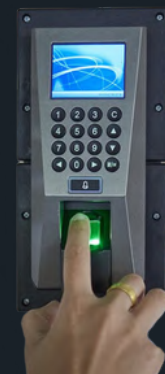

POS SOLUTION

UPS SOLUTION

SWITCHES & ROUTERS

ACCESS CONTROL SOLUTIONS.

DATA CENTER SOLUTION

ALL TYPES OF LAPTOPS SOLUTION

VIDEO WALL SOLUTIONS

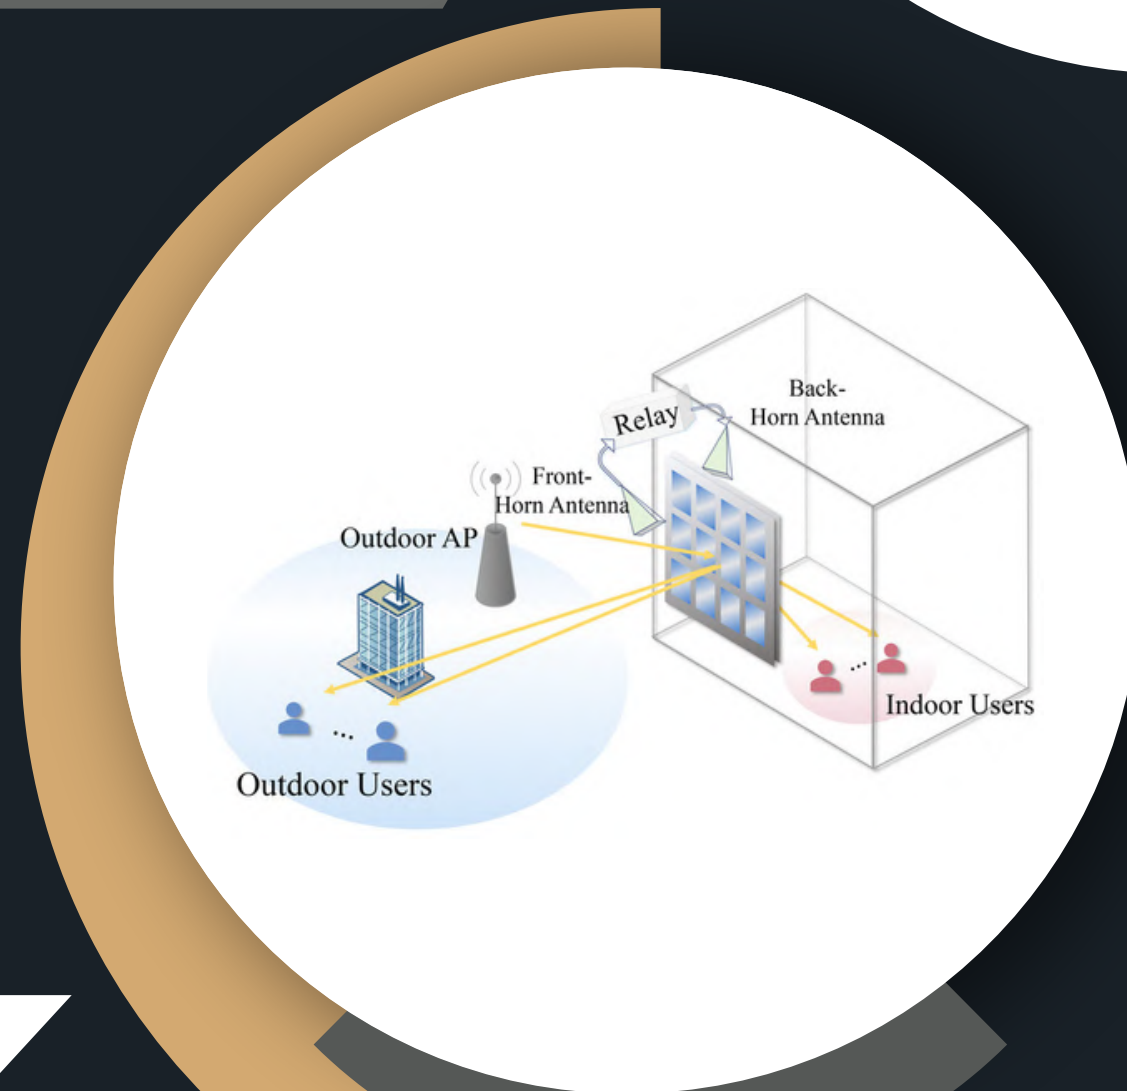

PUBLIC ADDRESS SYSTEM

NETWORK SOLUTION

Network solutions refer to the various technologies, tools, and strategies used to design, implement, manage, and secure computer networks. These solutions are essential for organizations to establish and maintain efficient and reliable communication systems.

Wireless Local Area Network (WLAN)

System-Area Network

Wireless Outdoor Network

Passive Optical Local Area Network (POLAN)

SERVER & STORAGE SOLUTION

Server and storage solution providers offer ongoing management services to optimize server and storage performance, availability, and reliability. They monitor server and storage resources, perform regular maintenance tasks, troubleshoot issues, and implement upgrades or expansions as needed.

 **Rack Servers**

 **CISCO, HPE, DELL, IBM Servers**

 **Micro Servers**

 **Tower Servers**

 **SAN & NAS Storage**

IT INFRASTRUCTURE SOLUTION

IT infrastructure solution services involve designing, implementing, and managing the entire IT infrastructure of an organization. This includes network, server, storage, security, and other components necessary for the smooth operation of IT systems.

Structured Cabling

Firewall Configuration

Cabinets Organization

IP TELEPHONY SOLUTION

IP Telephony Solution is a telephone system that works over the internet instead of via conventional copper wires. It relies on a communication protocol known as the Voice over Internet Protocol (VoIP), IP telephony uses the Internet Protocol's packet-switched connections to support voice calling, voicemail, video calling, video conferencing, faxing and instant messaging (IM).

CISCO IP Telephony

AVAYA IP Telephony

D-Link IP Telephony

Grand Stream IP Telephony

3CX Ip Telephony

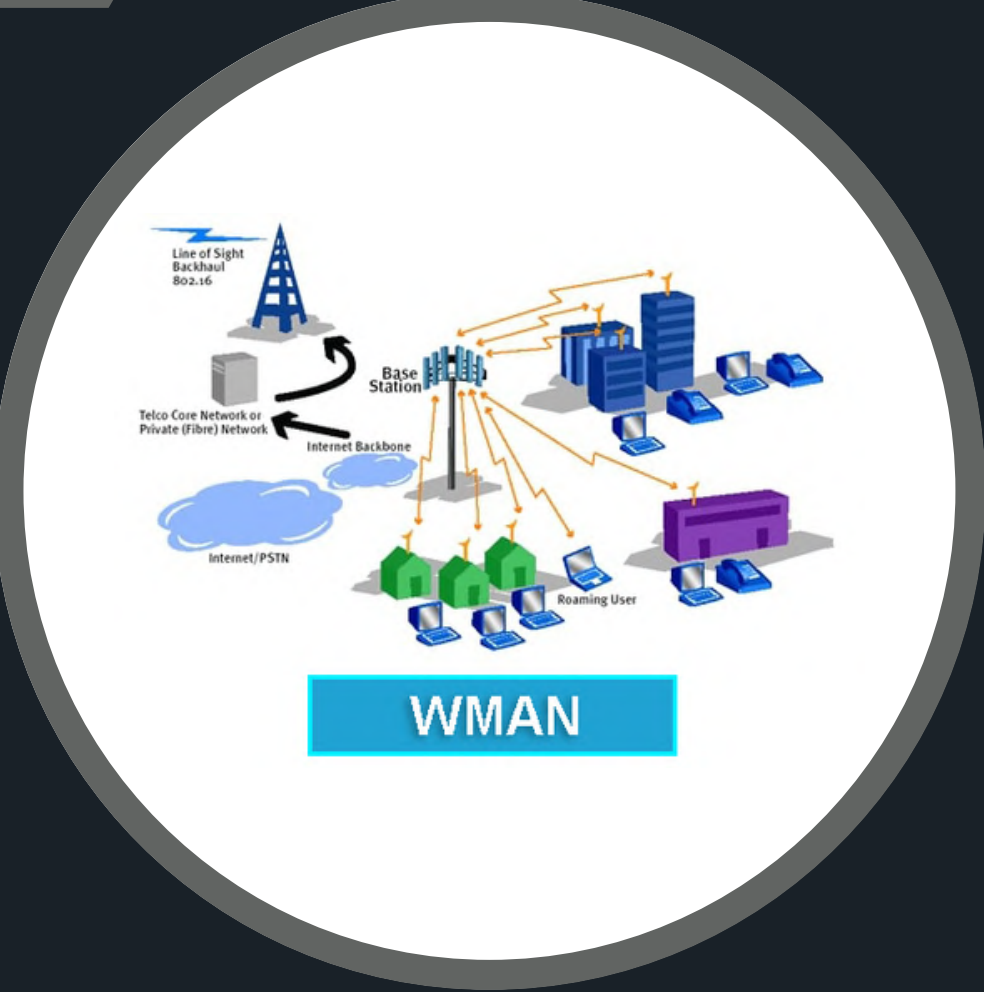

WIRELESS SOLUTION

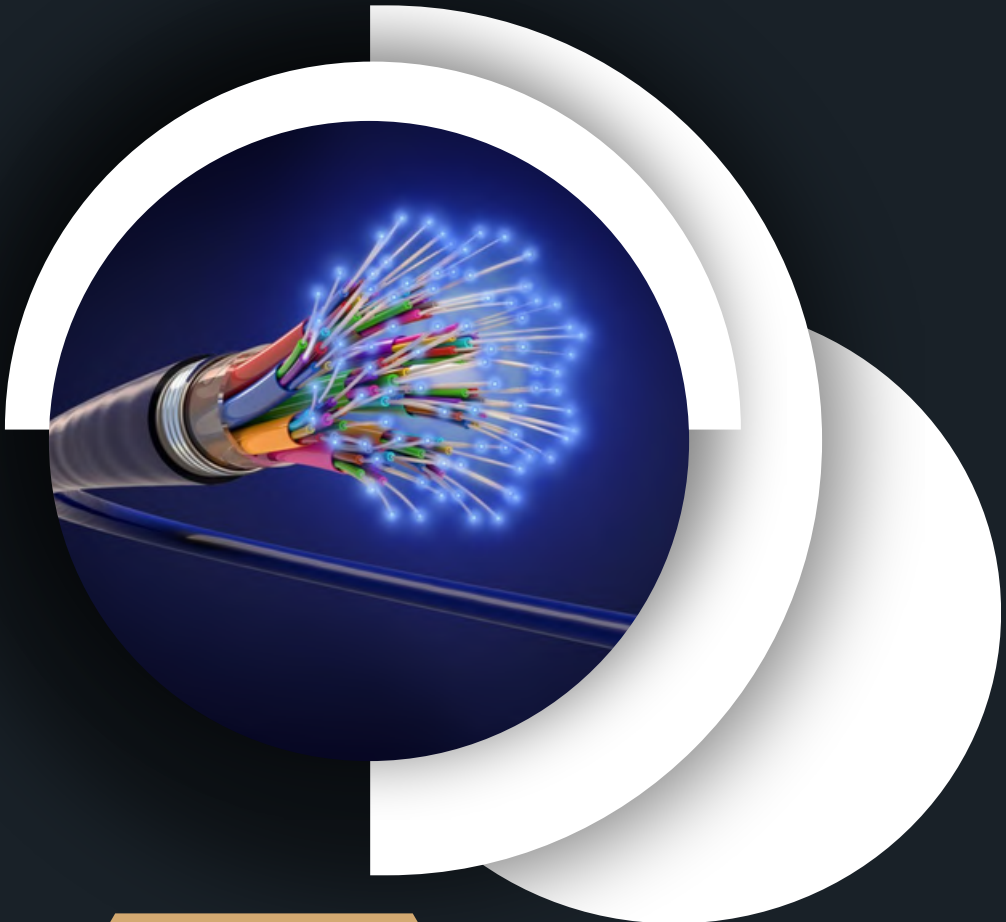

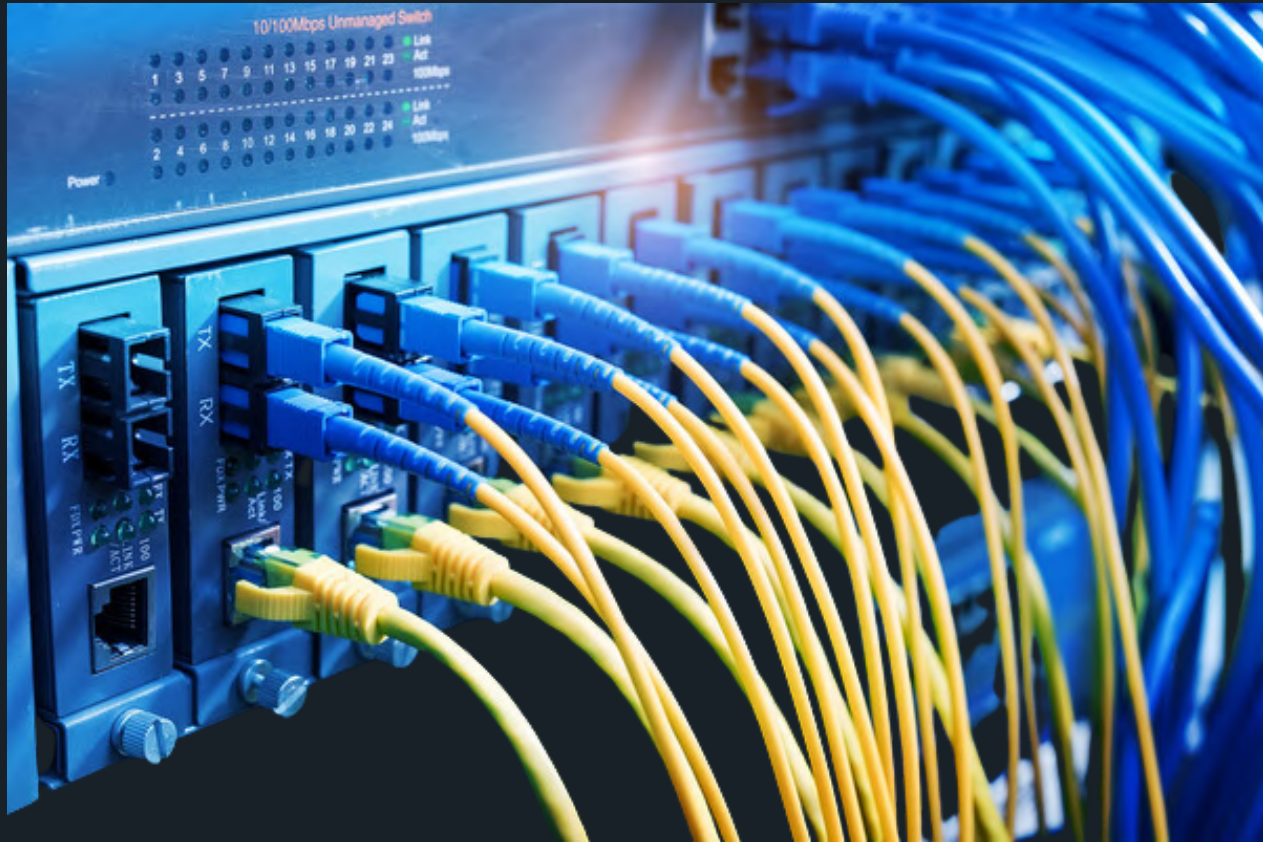

Wireless Solution Providers offer wireless networking solutions for organizations. They design and implement wireless networks, ensuring secure and reliable connectivity throughout the organization. They install access points, configure wireless routers, and optimize network performance.

-  Wireless LAN
-  Wireless MAN
-  Wireless WAN
-  Wireless PAN

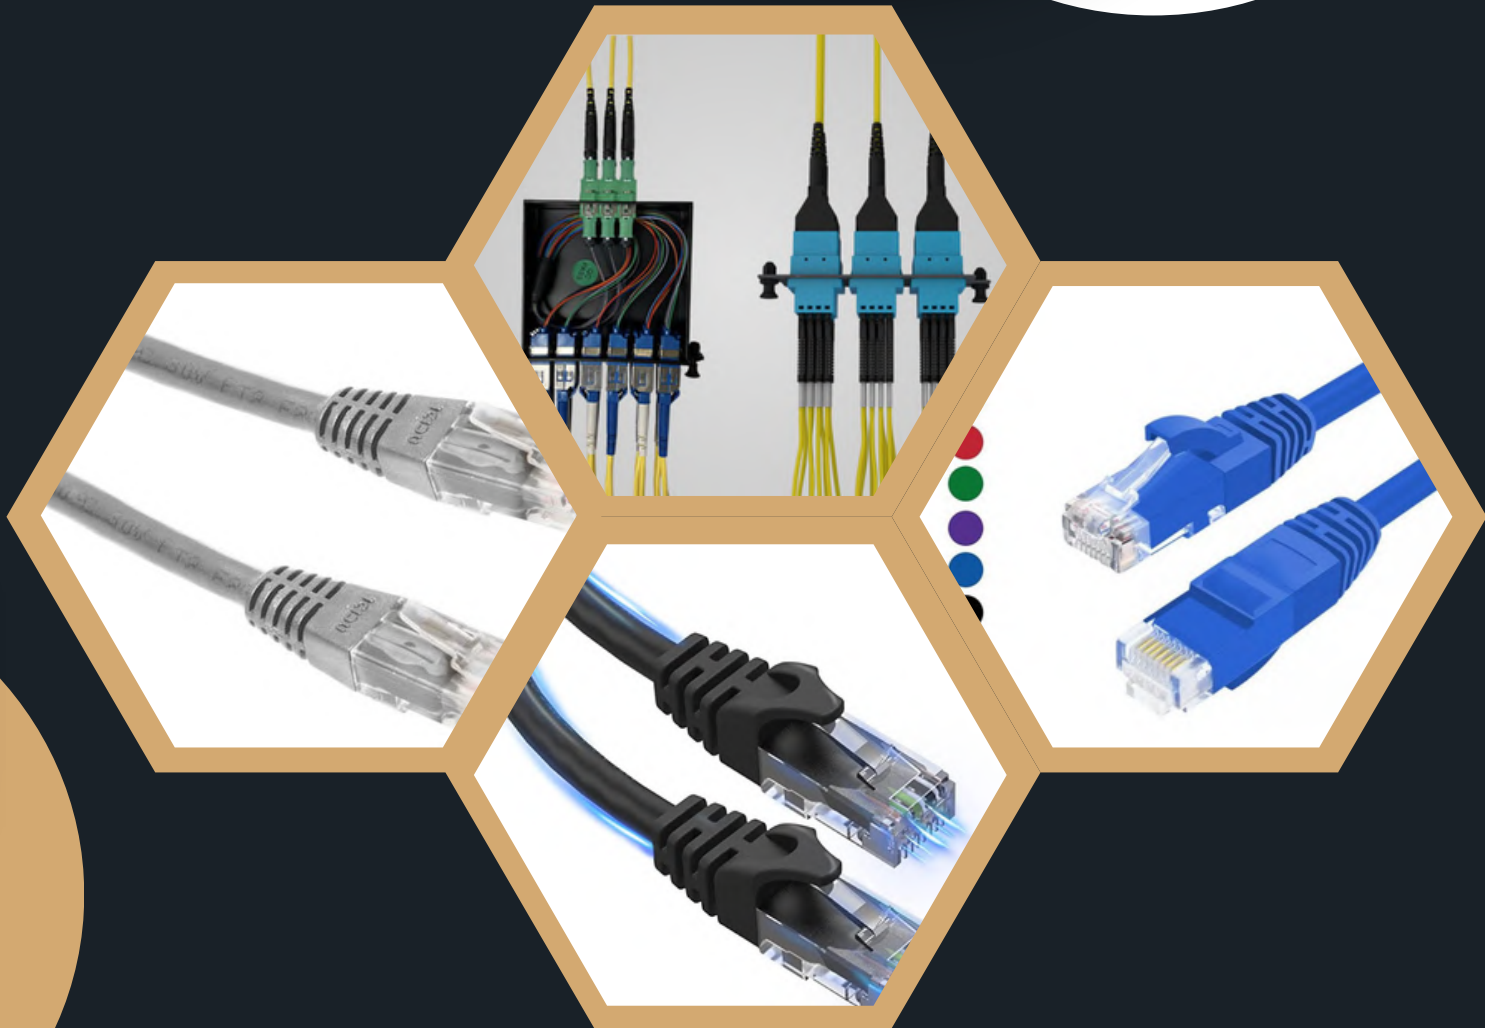

FIBER & UTP SOLUTION

Fiber and UTP (Unshielded Twisted Pair) solutions are another type of IT infrastructure solution provided by IT infrastructure solution providers. These solutions involve the installation and configuration of fiber optic cables or UTP cables to establish high-speed and reliable network connections within an organization.

-  **Fiber Optic Single & Multimode**
-  **UTP Cat5**
-  **UTP Cat6**
-  **UTP Cat6A**

SWITCHES & ROUTERS

Switches are networking devices that connect multiple devices within a local area network (LAN). They operate at the data link layer of the OSI model and use MAC addresses to forward data packets to the appropriate destination. Routers, on the other hand, are networking devices that connect multiple networks together. They operate at the network layer of the OSI model and use IP addresses to route data packets between different networks.

 **DELL,HP, and Aruba Switches**

 **CISCO & AVAYA Switches**

 **D-LINK & TP-LINK Switches and Routers**

 **Linksys Switches and Routers**

ACCESS CONTROL SOLUTIONS.

Access control solutions are used to regulate and control access to physical or digital resources within an organization. They can include technologies such as access control systems, biometric authentication, smart cards, and identity and access management (IAM) solutions.

-  Card reader
-  Fingerprint scanner
-  Turnstile
-  Parking barriers
-  Building Automation & Building management system

DATA CENTER SOLUTION

 **Raised Flooring**

 **HVAC**

 **Crac units for data center**

 **Ceiling/paint**

Data center solutions are designed to provide a secure and reliable environment for housing an organization's IT infrastructure. They include technologies such as server racks, cooling systems, power distribution units, and fire suppression systems. These solutions are essential for ensuring the availability and performance of critical IT systems and applications

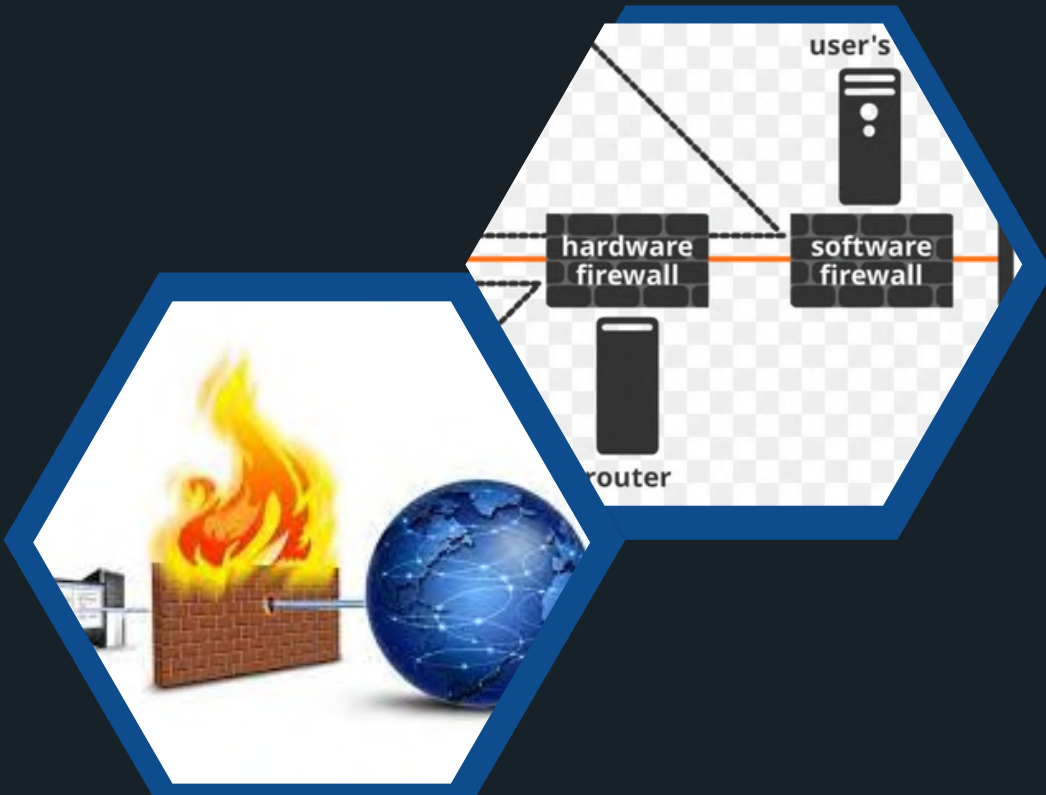

FIREWALLS & SECURITY SOLUTIONS

A firewall is a security solution that acts as a barrier between a trusted internal network and an untrusted external network, such as the internet. It monitors and controls incoming and outgoing network traffic based on predefined security rules. The primary purpose of a firewall is to prevent unauthorized access to or from the network while allowing legitimate communication.

-  Software firewalls
-  Hardware firewalls
-  Depending on their structure

CCTV SURVEILLANCE SOLUTIONS.

CCTV (Closed Circuit Television) surveillance solutions are another security measure that can enhance the overall security of a network or physical premises. CCTV systems use video cameras to monitor and record activities in specific areas. They can be used to deter potential criminals, monitor employee behavior, and provide evidence in the event of incidents or crimes.

 IP Cameras

 PTZ Cameras

 24/7 Color Cameras

 Smart Tracking Cameras

 Remote Surveillance

DATA CENTER MIGRATION

Data center migration refers to the process of moving an organization's data center infrastructure from one location to another. This can involve physically relocating servers, storage systems, networking equipment, and other components, as well as transferring data and applications.

 CLOUD DATA MIGRATIO

 STORAGE MIGRATION

 DATA BASE MIGRATION

HOTEL LOCKING SOLUTION

 **Magstripe**

 **RFID**

 **Operto Boost**

 **Pin code**

 **BLE (Bluetooth Low Energy)**

A hotel locking solution refers to the technology and systems used to secure hotel rooms and control access to them. This typically involves electronic key cards or mobile apps that allow guests to unlock their rooms, as well as backend software and hardware that manage and monitor the access control system.

POS SOLUTION

 **In-store POS systems**

 **Kiosk POS systems**

 **Mobile POS systems**

 **Touchscreen POS systems**

A POS (Point of Sale) solution refers to the technology and systems used to process transactions and manage sales in a hotel or hospitality setting. This typically involves hardware and software that enable the processing of payments, tracking of inventory, and generation of reports.

UPS SOLUTION

A UPS (Uninterruptible Power Supply) solution is a device or system that provides backup power to electronic devices in case of a power outage or fluctuation. It ensures that critical equipment, such as computers, servers, and networking devices, remain operational during power disruptions

 RACK MOUNTABLE UPS

 TOWER UPS

PUBLIC ADDRESS SYSTEM

A public address system (PA system) is a set of audio equipment used to amplify sound and broadcast announcements or music in public spaces. It is commonly used in settings such as schools, stadiums, airports, train stations, and conference centers.

-  Amplifiers
-  Speakers
-  Microphpnes
-  Mixer/Controller

ALL TYPES OF DESKTOPS & LAPTOPS SOLUTION

For small and medium-sized businesses that are more established, you'll likely have a stable working environment which will give you many more computer options to choose from. If you decide to have a mix of laptops and desktop computers available, this will give employees an easier opportunity to work from home or for the office and travel for work too.

 All in One Laptops

 Desktops

 Laptops

 Workstations

VIDEO WALL SOLUTIONS

A video wall (also known as a display wall) is a large visualization surface consisting of multiple displays. Initially, they consisted of multiple televisions or monitors that were put closely together. The objective was to make it seem like one large display surface. The problem, however, was the large frame (or bezel) surrounding each television's useful display surface.

IT Experts

King Abdul Aziz International Airport Jeddah

Provided IT Networking Services, Hardware and Software

IFFCO KSA

Conducted Project to supply IT Equipments and software solutions from DELL

OUR HIGHLIGHT PROJECTS

Pakistan International School Jeddah (PISJ)

Fulfilled Requirements of IT/Computer Labs Provided for Other School Requirements

King Abdullah Financial District, Riyadh

Conducted multiple projects to supply hardware equipment and software

National Center For Environmental Compliance

Provided DELL servers and PCs
Provided FortiGate firewall and licenses

Batterjee Factory for Baby Care and Cosmetics

Completed multiple projects and supplied IT Enterprise Hardware and Software Solutions

Budget Rent A Ca

Supplier of various IT Equipments and products from:

OUR HIGHLIGHT PROJECTS

Implemented 55 Cameras at their warehouse,

Implemented 62 Cameras at their Head Office, Tahlia Street,

Implemented 64 Cameras at their Amusement Park,

SLA with ALJ for Dynabook laptops

Installed complete CCTV surveillance system HIKVISION and other security solutions for more than 50 branches

Provided Lenovo Laptops & Desktop Pcs

Supplied IT Hardware Software Solution

DELL, CISCO , BARRACUDA, NETWORK

Supplied IT Hardware Software Solution

DELL,CISCO ,HP,TP LINK

Hardware Equipments supply projects with products from

DELL, CISCO,HP

Implemented 32 Cameras at their Hotel, Al Rawdah

Street, Jeddah, Saudi Arabia

Implemented 15 Cameras at their Jeddah & Riyadh

Restaurants, Saudi Arabia

Supply of various IT Enterprise Hardware and Software Solutions

LENOVO, DELL, MICROSOFT

Supplied IT hardware equipment from:

HP ,CISCO

Vfs GLOBAL

Installed HIKVISION CCTV surveillance system for all VACS in KSA.Installed access control system (Honeywell, Hikvision & aldahua)

National Center For Environmental Compliance

Provided DELL servers and PCs Provided FortiGate firewall and licenses
